Skills

Web and mobile

- Next.js
- React
- TypeScript
- JavaScript
- Tailwind CSS
- React Native
- Flutter
- PWAs

Backend and data

- Supabase
- PostgreSQL
- Node.js
- Python
- Flask
- PHP
- Prisma
- Firebase
- SQLite

Infrastructure

- Linux VPS
- Self-hosted Supabase
- Vercel
- Git and GitHub

Robotics and IoT

- ESP32
- Arduino C/C++
- Raspberry Pi
- MicroPython
- Sensors
- Web Serial
- LoRa

AI and teaching

- LLM APIs
- Prompt engineering
- VB.NET
- Curriculum design
- Team coaching

Tafadzwa Wilson Sedze

Full-stack software engineer, systems developer, robotics and IoT

First Class Computer Science graduate who builds production software and the robots that run on it. I designed and maintain RoboKorda Africa's internal ERP, build systems for schools, and have taken student robotics teams from national wins in Zimbabwe to international competitions in Switzerland, India and China. Core stack: Next.js, TypeScript and Supabase, with hands-on ESP32 and Raspberry Pi work.

Experience

Systems Developer and Robotics & Coding Instructor 2025 – Present

RoboKorda Africa, Rusununguko ZIMFEP High School

- Designed, built and maintain **RoboCore**, RoboKorda Africa's internal ERP on Next.js and Supabase, live since March 2026. I own the schema, admin workflows, deployment and maintenance.
- Build enterprise systems for schools, including an **RFID staff attendance system** where ESP32 readers feed a live Next.js dashboard through Supabase Realtime.
- Build live telemetry dashboards and control consoles for competition robots: a mining rover with gas and climate sensing, and two underwater drones streaming pH, temperature, turbidity and camera video.
- Led student teams to **international robotics competitions** in Switzerland (2025), India (2025) and China (2026) after national wins.
- Teach robotics and coding, and develop curriculum content for RoboKorda's school programmes.

Software Engineer and Robotics Instructor, Intern Jun 2024 – Jun 2025

RoboKorda Africa

- Built and maintained web platforms with Next.js, React, TypeScript, Tailwind CSS and Supabase, deployed on Vercel.
- Delivered dashboards, admin flows and database-driven features, and designed a PWA architecture so key tools kept working offline.
- Supported robotics and coding classes with lesson content, device prototyping and competition preparation.
- Wrote end-of-term system performance reports for stakeholders.

Education

BSc Hons in Computer Science First Class

Manicaland State University of Applied Sciences, Sep 2022 – Jul 2026

ZGCE Advanced Level

St Francis and St Clare Secondary School, Nov 2021

Attained 15 points in Mathematics, Computer Science and Physics.

ZGCE Ordinary Level

St Francis and St Clare Secondary School, Nov 2019

8 subjects at C or better, including Mathematics and English.

National Foundation Certificate in Computer Operations and Packages

Ministry of Higher and Tertiary Education, Dec 2019

Certifications

Software Engineering, Back-end
ALX Africa, Holberton School. 12 months, Feb 2025
[Verify certificate](#)

ICDL Robotics
ICDL Africa, May 2025
[View certificate](#)

AI for Beginners
HP LIFE, Sep 2025
[View certificate](#)

Data Science and Analytics
HP LIFE, Jun 2025
[View certificate](#)

Agile Project Management
HP LIFE, Jun 2025
[View certificate](#)

Business Email
HP LIFE, Jun 2025

Tafadzwa Wilson Sedze

Full-stack software engineer, systems developer, robotics and IoT

Projects

Kiosk+ patient robot kiosk Next.js 14, Prisma, Web Speech API
Final-year dissertation and Cimas Healthathon 3.0 entry

- Digital receptionist kiosk for Zimbabwe’s public hospitals, designed around Mutare Provincial Hospital.
- Symptom triage, appointment booking, queue management and doctor dashboards, with voice interaction in **16 Zimbabwean languages**.

RFID staff attendance system ESP32, Supabase, Next.js

- RFID readers post check-ins to Supabase, and a dashboard shows attendance live through Supabase Realtime.
- Designed the data model, device firmware and web dashboard.

Carbon capture power station model ESP32, Web Serial

- Scale model of Hwange Power Station with a carbon-capture stage, monitored by MQ-9, MQ-135 and DHT11 sensors.
- Browser dashboard reads the sensors directly over Web Serial, with no backend.

Substance Sentry React Native

- Mobile app offering education, prevention resources and support to people affected by drug and substance abuse.

Real-time chat app React, Python

- Chat application with user authentication, message storage and real-time updates.

On the international stage

Student robotics teams I led to international competitions after winning nationally in Zimbabwe.

Switzerland
2025
Mavhudzi High School

India
2025
Rusununguko ZIMFEP High School

China
2026
Rusununguko ZIMFEP High School
